OUTSIDE the FRAME

Whether you're jet-setting around the world or just "wanderlusting" from home, this passport holder is great for anyone who's been on a bit of a travel kick. I love cases that come in a bright color so it's easy to find in the midst of a very full carry-on bag. -JU

MOST LIKELY METAL

20/20 INSIGHT: Frame materials are seemingly becoming more exotic—from wood, leather, horn and beyond, your frames can essentially be constructed of any material you can think of. But one material that still reigns strong in frame design is metal. No matter its form, color or shape, metal frames are still making a statement.
