WestGroupe's Evatik brand has launched five new styles from its spring 2018 collection.

The eyewear company explained that the range is inspired by European eyewear trends and architectural design.

It features "top quality materials, unique constructions and pops of colours, creating a minimalistic and contemporary masculine look that has an understated luxury."

Highlighted by Evatik is the 'E-9162' model (pictured), which has a diamond cut acetate front with metal arms. It also features screw-less barrel hinges, and is available in hues of black, tortoiseshell black and grey.
