MIX IT UP

20/20 INSIGHT: Let's forget the days when frames were strictly made out of either acetate or metal. Now it's time to add a bit of flair to styles with the addition of interesting and eye-catching materials. Whether its titanium, leather, wood or crystals, frames with mixed materials are perfect for those searching for an extra pop of color or sparkle. —*Victoria Garcia*

OWP 1760 OWP

With elaborate titanium details on each temple, this optical frame features a straight-line design with a feminine square lens for a delicate look.

Pricing: \$\$\$\$
