Evatik releases new men's frames for its Summer collection

PLATTSBURGH, NY— Evatik has released two new styles for its men's Summer collection. Both frames come in three different color combinations.

▶ **E-9169** features a flat metal front, matte finish, and contrasting colorations of brown forest, black red, and grey cobalt. Temples are etched with a herringbone pattern for a textured look.

◀ **E-9170** has a horn-patterned acetate that features contrasting finishes. The woodgrain finish on the top front of the frame and the temples accentuates the high-gloss finish on the bottom front. This large-fit frame is available in color combinations of olive wood, brown wood, and black wood.

La Matta releases new women's styles for Summer 2018

MILAN, ITALY— Animal prints are still the main theme of La Matta's core models. La Matta, Area98's womenswear brand, unveils its new models for its core collection and capsule collection for spring/summer 2018.

LM3222 has a boxy frame front and plays on the contrast of two-tone acetates, while the hinges of the temples feature nuggets of acetate.

LM3231 is a wider, slightly cat-eye design. It features a three-dimensional glazed metal insert with three small contrasting inserts.

La Matta capsule collection has been enhanced with four eyeglasses models: **LM3232**, **LM3233**, **LM3234**, and **LM3235**. The new products display patterns in which cheetahs or coral snakes are combined with floral motifs which are exhibited along the brows and the temples.
