

WestGroupe's EVATIK Adds Two Styles

By Staff

Friday, July 6, 2018 12:08 AM

EVATIK from [WestGroupe](#) has added two new styles for summer that combine interesting patterns and refined finishes. Frame style E-9172, which is a round version of the May release style, E-9170, showcases a unique horn patterned acetate coupled with contrasting finishes. The woodgrain finish on the upper part of the frame front and the temples accentuate the high gloss finish on the lower portion of the frame front. This new frame style is available in color combinations of olive wood, brown wood and black wood. The second new July release from EVATIK, E-9173 is laminated with a translucent horn patterned acetate on the lower part of the frame front and a solid color acetate. The beveling along the end pieces and the brow line gives a 3D appearance to the acetate, while revealing the second layer. A flat OBE spring hinge features subtle branding engraved on it. E-9173 is offered in grey blue horn, brown horn and black horn.
