

# Elements of Elegance

By Margaux Feldman - April 17, 2019 👁 14 💬 0

Minimalistic style and architectural design elements are showcased in the new **EVATIK** releases. Combining fine detailing with subtle pops of color, the new styles provide the perfect balance between comfort and luxury.

*E-9188 by EVATIK*

Semi rimless style **E-9188** stands out with a precise laser cut groove on the top edge of the frame that is finished in accent color. The temples are pierced creating a linear design element and finished with a pop of color. This large fit frame has a monoblock front and is available in hues of olive red, black grey and grey line green.

*E-9190 by EVATIK*

Style **E-9190** features a modern twist to the classic navigator shape. The frame front is in a handmade, horn patterned acetate, which is wrapped in metal along the top edge of the frame. Metal temples and a double bridge complete this combination frame that is offered in grey horn, black cognac and black grey.

*E-9191 by EVATIK*

Large fit frame, titanium style **E-9191** is a rectangular shape, monoblock front that has an architectural inspired hinge that sets it apart. Inspired by the silhouettes of tall skyscraper buildings, the flex hinge is added comfort without a spring hinge. Available in color combinations of khaki silver, black silver and grey silver.
